The Necessity of Instant Communication

In today's fast-paced environment, manual communication is a bottleneck. Businesses require immediate, automated channels to reach customers and staff where they are—on WhatsApp.

99.9% System Uptime | **5 Minute** Setup Time | ∞ Messages/Month

Breaking the Subscription Cycle

Traditional WhatsApp Business API	Sabre WGateway
❌ R500 - R2,000+ per month subscription	✅ One-time R2,499 / $149 payment
❌ Per-message fees that add up quickly	✅ Once-off fee for the life of the computer
❌ Complex approval process (weeks) & Verification	✅ Unlimited messages included
❌ Rigid template messages only	✅ Immediate setup (scan QR code)
	✅ Simple REST API works with any language

Get Connected in Three Steps

01

Install & Configure

Download the installer. The gateway automatically installs as a Windows service. Configure your port and API key.

02

Scan QR Code

Open the web dashboard in your browser. Scan the displayed QR code with your mobile WhatsApp app to link the session.

03

Start Sending

Use the API from any application to send order confirmations, alerts, or reminders immediately.

A Universal REST API

One POST request to send a message. Works with JavaScript, Python, C#, PHP, or any language capable of HTTP requests.

```
POST http://localhost:7000/send
Content-Type: application/json
X-API-Key: your-api-key

{

  "phone": "27821234567",
  "message": "Your order is ready! 🎉"

}
```

1 API call to send

Native Integration in Your Preferred Language

Node.js

```javascript
const response = await fetch('http://localhost:7000/send', {
  method: 'POST',
  headers: { 'X-API-Key': 'your-api-key' },
  body: JSON.stringify({ phone, message })
});
```

Python

```python
import requests
requests.post('http://localhost:7000/send',
    headers={'X-API-Key': 'your-api-key'},
    json={'phone': phone, 'message': message}
)
```
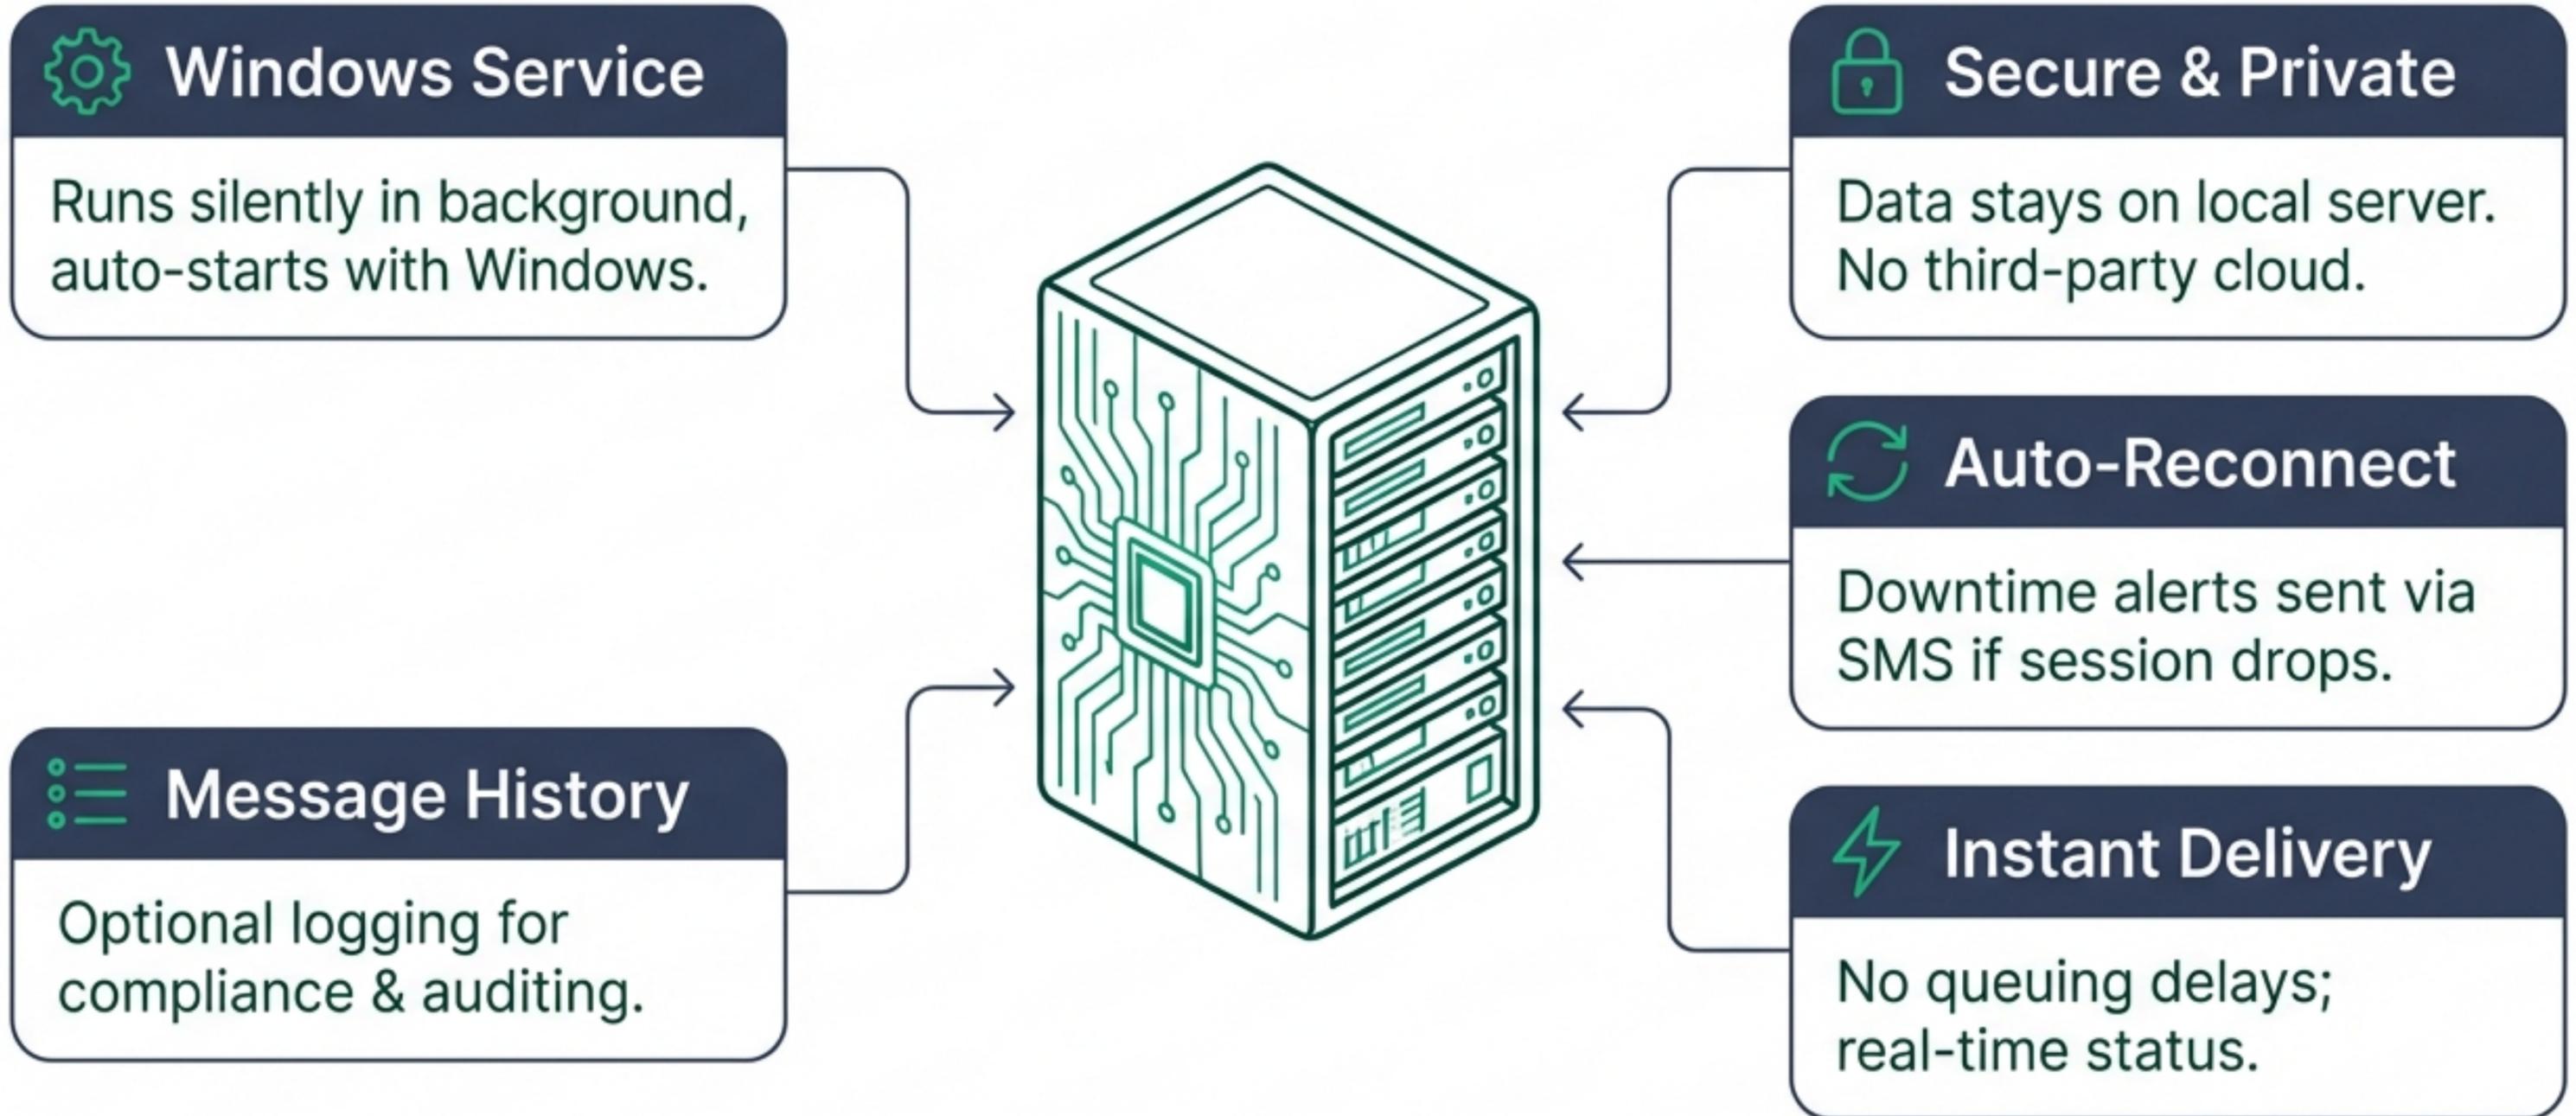

C# / .NET

```csharp
var client = new HttpClient();
client.DefaultRequestHeaders.Add("X-API-Key", "key");
await client.PostAsJsonAsync("http://localhost:7000/send",
    new { phone = phone, message = message });
```

cURL

```bash
curl -X POST http://localhost:7000/send \
  -H "X-API-Key: your-api-key" \
  -d '{"phone": "123", "message": "Hello"}'
```
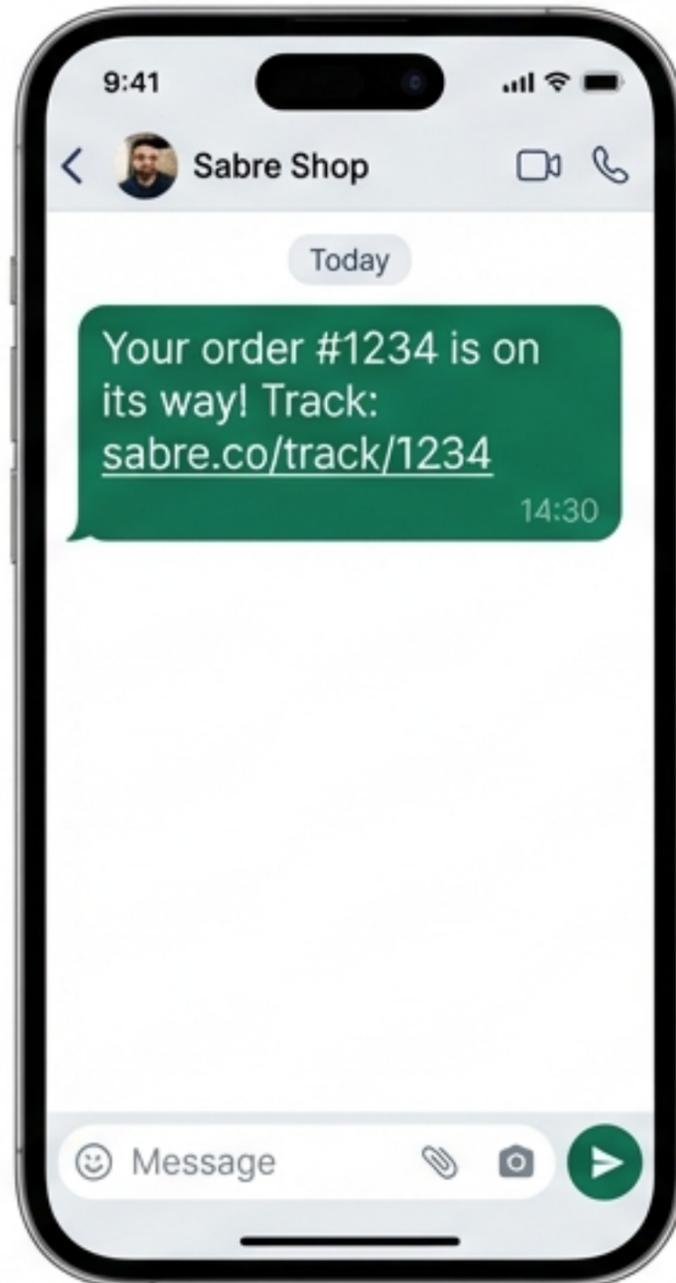

Full documentation with further examples available in the product download.

Built for Reliability and Privacy

Windows Service
Runs silently in background, auto-starts with Windows.

Secure & Private
Data stays on local server. No third-party cloud.

Auto-Reconnect
Downtime alerts sent via SMS if session drops.

Message History
Optional logging for compliance & auditing.

Instant Delivery
No queuing delays; real-time status.

# Enhancing Customer Experience

Streamlining Operational Alerts

Security
⚠️ ALERT: Motion detected at Main Gate. Guard dispatched.

IT & DevOps
🚨 Server CPU at 95%. Auto-scaling triggered.

HR & Payroll
Your payslip for January is ready. View: payroll.company.com

Seamless integration with Sabre SOS, Visitor, and Guard Patrol products.

Pay Once, Use Forever

Sabre Users

Free

Included with Sabre SOS, Visitor, Guard Patrol, or Payroll.
